Professional Summary

Detail-oriented MCA graduate with a strong foundation in data processing, scripting, and analytics. Skilled in Python, JavaScript, and SQL with hands-on experience in data validation, transformation, and API integration. Familiar with end-to-end project lifecycle, SDLC, and data workflows. Eager to contribute to data-driven projects while learning advanced tools such as SPSS, Dimensions, and Nfield.

Technical Skills

Programming & Scripting: Python, JavaScript

Data Processing & Analytics: SQL (Basic), Data Cleaning, Data Transformation, Data Validation, Excel, Power BI

Statistical & Analytical Tools: Basic Statistics, Exposure to SPSS concepts, Data Interpretation

Web & Development Tools: React.js, Node.js, MongoDB, REST APIs, Git, VS Code, Postman, Endpoints

Concepts & Methodologies: SDLC, Data Workflows, Debugging, API Integration, Database Management, Reporting & Visualization

Projects Built

Task Manager Application (MERN Stack)

- Designed and developed a full-stack task management system with complete CRUD functionality.
- Implemented structured data handling with strong validation techniques to ensure accuracy and consistency.
- Integrated RESTful APIs for efficient data communication between frontend and backend.
- Applied debugging techniques to identify and resolve data inconsistencies.
- Ensured timely execution and delivery of features following SDLC practices.

Product Management System (Inventory & Data Flow System)

- Built a data-driven inventory management system to handle product lifecycle and stock tracking.
- Designed API-based architecture for seamless data flow and real-time updates.
- Implemented data organization, validation, and reporting mechanisms to improve accuracy.
- Developed dashboards using Power BI concepts for better data visualization and insights.
- Focused on quality checks and structured workflows aligned with data processing standards.

MERN Shield (Authentication & Security System)

- Developed a secure authentication system using JWT (JSON Web Tokens).
- Implemented data validation, encryption, and role-based access control mechanisms.
- Ensured compliance with security best practices and error handling processes.
- Conducted testing and debugging to maintain data integrity and system reliability.

React Calculator (Logic-Based Application)

- Developed a dynamic calculator application using React Hooks.
- Implemented logical operations and input validation to ensure correct calculations.
- Focused on user input accuracy and responsive UI behavior.

Data Processing & Analysis Mini Project

- Performed data cleaning, transformation, and validation using Excel and Python.
- Handled structured datasets and ensured accuracy through validation rules.
- Conducted basic statistical analysis and generated reports for insights.
- Simulated real-world data processing workflows similar to market research projects.

Relevant Knowledge

- Understanding of end-to-end project lifecycle and SDLC.
- Awareness of Market Research (MR) lifecycle and data collection processes.
- Knowledge of data validation, transformation, and quality control techniques.
- Familiarity with relational databases and structured data handling.
- Basic understanding of weighting concepts and statistical interpretation.

Soft Skills

- Strong attention to detail and accuracy
- Time management and ability to meet deadlines
- Effective communication and teamwork
- Adaptability and quick learning ability
- Problem-solving and analytical thinking

Education

Master of Computer Applications (MCA)	Aurora's PG College, 2023
Bachelor of Commerce (Computer Applications)	Nava Chaitanya Junior College, 2019
Intermediate (MPC)	Narayana Junior College, 2014
SSC	Dwaraka High School, 2012

Additional Information

- Willingness to learn tools such as SPSS, Quantum, Dimension, and Nfield
- Comfortable working in cross-functional and multicultural teams
- Committed to delivering high-quality output aligned with defined metrics and timelines
- Willing to work in any shift to support team and project requirements
